

Help Us Become a Plastic Free Letchworth

Ever considered reusable nappies as an environmentally friendly alternative to disposable nappies?

Reusable nappies are easy to use, fit as snugly as disposables, are kind to your baby's skin as they have no chemicals or oils, and come in fun designs.

Changing to reusable nappies will reduce the amount of landfill waste, much of which contains single-use plastic, whilst saving you money.

A child's nappy will be changed about 5,000 times before they are potty trained.

Interested in finding out more?

The North Herts District Council have lots of information online and provide a free cloth nappy starter kit worth over £100.
